

The Voyage of the "Salacia" Catalina 42 mkII Sailed by: Lucian Jorg

Sailing across the Pacific means entering a different world consisting of unexplored islands seemingly forgotten and untouched by the materialism of the world as we know it.

Enjoying the simplicity of the indigenous tribes of the South Pacific, learning about their culture and understanding their way of life is for me the most rewarding experience.

Cruisers are bound together by the camaraderie and friendship born out of sharing a dream. Friends and family members build the support at home, that becomes so important when communication is of the essence. The boat one chooses becomes more than a vehicle. It is my home, my shelter, my armor during bad weather and the only barrier between the open ocean and myself. When Catalina Yachts introduced the 42 mkII my decision was made. Thank you Catalina Yachts for an outstanding design and the ongoing world wide support you have extended to me. If cruising is your dream, make it happen and don't wait too long. This lifestyle is more rewarding than you could ever imagine.

Hope to see you out there some day,

*Lucian Jorg
